NEW DELHI 3 (INDIA);

The 12th June, 1950.

S. P. JAIN,  
for Registrar General, India.

# NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

**TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT**

\* In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

+ Figures not available.

Explanation of symbols used :—B.—Births ; R. R.—Birth rate ; C.—Cholera ; S.—Smallpox ; P.—Plague ; F.—Fever ; D. D.—Dysentery and Diarrhoea ; R. D.—Respiratory Diseases ; M. D.—Maternal Deaths ; D. R.—Death Rate ; I. D.—Infantile Deaths (included in total deaths).

## REMARKS

The figures of births and deaths shown in this statement for the week ending the 20th May, 1950 relate to 158 towns with an estimated population of 18,359 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 68% of the total number of towns representing 65% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 10,553 and 8,389 representing birth and death rates of 29·9 and 23·8 per thousand of population respectively.

(A) *States (Parts A and C).*—The data here relate to 135 towns with an estimated population of 15,881 thousands. Information about Assam, Bihar, Delhi, Orissa and Madhya Pradesh could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 67% of the total number of towns representing 64% of the total population is covered. The numbers of births and deaths recorded in these towns were 9,209 and 7,691 representing birth and death rates of 30·1 and 25·2 per

thousand of population respectively. The table at the end gives the position by states.

The towns of Hathras, Etawah, Sambhal, Banaras and Farrukhabad-Fategarh in Uttar Pradesh recorded high death rates of 91·2, 74·4, 61·9, 53·7 and 51·2 per thousand of population respectively. The high death rates in these towns were largely due to deaths from fevers; deaths from respiratory diseases also were considerable in Etawah and Farrukhabad-Fategarh. Smallpox accounted for a fair number of deaths in Sambhal.

(B) *States (Part. B).*—The data here relate to 23 towns with an estimated population of 2,478 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 72% of the total number of towns representing 68% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,344 and 698 representing birth and death rates of 28·2 and 14·6 per thousand of population respectively.
